

DAV PUBLIC SCHOOL, SECTOR-14 GURUGRAM

Cancer Awareness Campaign

Nukkad Natak Presentation by the students of DAV Sector 14 in school auditorium and at Max hospital on 31.5.2019

To inculcate awareness about the harmful effects of lung cancer, the students of DAV Public School, Sec-14, Gurugram staged a Nukkad Natak at their school for all the class IV employees and the support staff. The endeavour was to sensitise them about the harmful effects of consuming tobacco- maybe by smoking or chewing pan masala or gutka, which affects one's mouth, lungs and other parts of the body. This also leads to increased cases of lung and mouth cancer.

In order to convey the message to the community at large, these students also performed the Nukkad Natak at Max Hospital, Gurugram. They tried to make people aware by using placards, posters, and songs highlighting the risks involved in the chewing of tobacco and smoking.

Many senior doctors, members of common public and other staff of Max Hospital came to witness this Nukkad natak. The students warned the people about lung cancer, heart problems, mouth cancer etc. that are caused due to smoking. They also gave a message against passive smoking and advised the people to shun cigarette, bidi, pan masala, gutka, etc. which shortens precious lives and leads to many deaths.

The audience appreciated the efforts made by the students.
