

A Report on Fire Safety Workshop

***“Safety does not come with luck.
It has to be prepared.”***

Accidents don't occur with a warning; hence everyone should be prepared beforehand. For instance, a fire can occur at any time at any place, but with the proper knowledge of safety measures, one can prevent major accidents from happening. So, to educate our budding students, a 'Fire Safety Workshop' was organized at DAV Public School, Sector-10A, on 9 August 2019.

The workshop focussed upon educating children about various kinds of fire and the numerous ways of dealing with them. Students were also familiarized with the working of fire extinguishers and were given some easy and life saving tips that they could easily follow in case of an emergency. The session proved out to be informative and imparted life saving techniques and skills.
