

## Inter School Model Making Competition at Lions Public School, Gurugram

**"THE SCIENCE OF TODAY IS THE TECHNOLOGY OF TOMORROW"**

It is very important for the students to explore and engage in enquiry based learning. This surely nurtures their inquisitive minds and unleashes creativity. Giving this due importance, an Inter school Model Making Competition was organised by Lions Public School, Gurugram on 3 November 2018.

Our budding congregators **Shambhavi Chandna** of IVA, **Kushagra Sharma** of IVC and **Kavya Stuti** of IIC participated in the event and made a model of *"ATMOSPHERIC WATER GENERATOR"* that captures humidity from air and converts it into clean drinking water. Our young scientists reflected their talent with utmost diligence and finesse and earned the **"Third Prize"** and brought another laurel to the school.
