

# Kindergarten Colouring Activity

*“The world is but a canvas to our imagination.”*  
Creativity and art are similar to the meaning of this quote as they both suggest imagination and wonder. Colouring is the most important educational tool for children. It helps in self expression, colour recognition, building motor skills and hand-eye coordination. To nurture the creativity of students, a colouring activity was conducted for kindergarten classes at D.A.V. Public School, sector 10A, Gurugram on 3 May 2019. The young buds participated enthusiastically and exhibited their artistic skills.
