Mathematics is a kind of science. We can’t think a single moment without mathematics. It has made our lives easy and comfortable. The primary objective of the celebration was to create love for the subject and to perceive the connections of mathematical concepts with the life situations.

Keeping this in mind, Maths week was celebrated with great enthusiasm in DAV Public School, Sector 10A, Gurugram from 19 December 2019 to 21 December 2019. The activities undertaken proved to be a great help in boosting the mathematical confidence of students. The celebration was indeed a huge success as the students actively participated in various events.
